Written Paper: This project is a group project consisting of a written and oral presentation. The written portion will begin with an introduction, followed by an annotated bibliography and summary/conclusion. The oral presentation will give each group the opportunity to share the information they gathered and learned during their research, especially helpful is the ability to share pictures and radiographs of the lesions. The APA writing style must be used in this paper. You may visit the Writing Center, 5-155 for guidelines and information regarding the APA writing style. In addition, there are various internet sites with good information on this writing style.

A minimum of four references (one for each student) must be included/cited in the annotated bibliography and must be from a reputable dental source, journal, book or federal government documents. Access or RDH magazines are not permitted, as these are magazines and are not considered peer reviewed journals. If you question a source, please see the instructor as to appropriateness and use. Only one internet site may be used as a reference. Only consider reputable internet sources for references. If you have question regarding references, please consult with the instructor.

The paper must contain the following components:

- Cover page: Topic: Title: Name: Course; Date
- Annotated Bibliography
  [http://lib2.skidmore.edu/tutorials/BuildAnnotatedBib/story_html5.html](http://lib2.skidmore.edu/tutorials/BuildAnnotatedBib/story_html5.html)
- Introduction
- Summary/Conclusion (Include practical application to our situation in radiology lab/clinic if applicable)
- Peer review
**Topic choices:**

Group 1: Inflammatory Lesions of the Jaws & Cysts and Cyst like Lesions of the Jaw

Group 2: Benign Tumors of the Jaw Malignant Diseases of the Jaws

Group 3: Diseases of Bone Manifested in the Jaws & Systemic Disease Manifested in the Jaws

Group 4: Soft Tissue Calcification and Ossification

**Due November 14th:** The Annotated Bibliography and the Summary/Conclusion. Each student in your group must contribute one resource, which is their contribution to the project. There will 2 points deducted for each day the paper is late.

**Due November 28th:** The group presentation.

**Evaluation:**

- Annotated Bibliography (Rubric) 50 points
- Summary of Information Presented 10 points
- Oral Presentation 20 points
  - Peer Review 10 points
- Electronic final copy to be submitted in safe assignment in blackboard. 5 points
- All documents are included in folder 5 points

Total= 100 points

*** Each group should submit written paper, a copy of the oral presentation and electronic rubric for peer review evaluation.

*** Please keep in mind that this is not a pathology course, the focus for this research is purely radiographic in nature.
